Our Company

Our company has been serving the commercial vehicle body manufacturing industry since 1977. Originally established under the name Torunlar Seri Kasa, we began our production activities with a commitment to quality and innovation. Since 2002, following our rebranding as Yenkar Torunlar and the registration of our trademarks, we have continued to add value to the industry through our expertise, quality-driven approach, and customer-focused solutions.

Manufacturing

We carry out our manufacturing operations with an innovative approach in a facility comprising 4,500 m² of indoor production space and 8,000 m² of outdoor area.

In addition, the other companies affiliated with our group are as follows:

YENKAR MOTOSİKLET

YENKAR METAL

ALUCAR VEHICLE BODIES

New Manufacturing Facility

Our company's new manufacturing facility will become operational in the near future. Our Chairman of the Board also serves as the President of YESAN (Yenişehir Industrial Cooperative), the organization responsible for overseeing the construction of this facility.

With the commissioning of this new facility, our company will expand its manufacturing operations to a total of 12,200 m^2 of indoor production space and 14,000 m^2 of outdoor operational area.

Our Certificates

Our People

Our manufacturing continues with the perfect balance of experience and innovation, bringing together team members who have been with us for over 20 years and the dynamic energy of the younger generation.

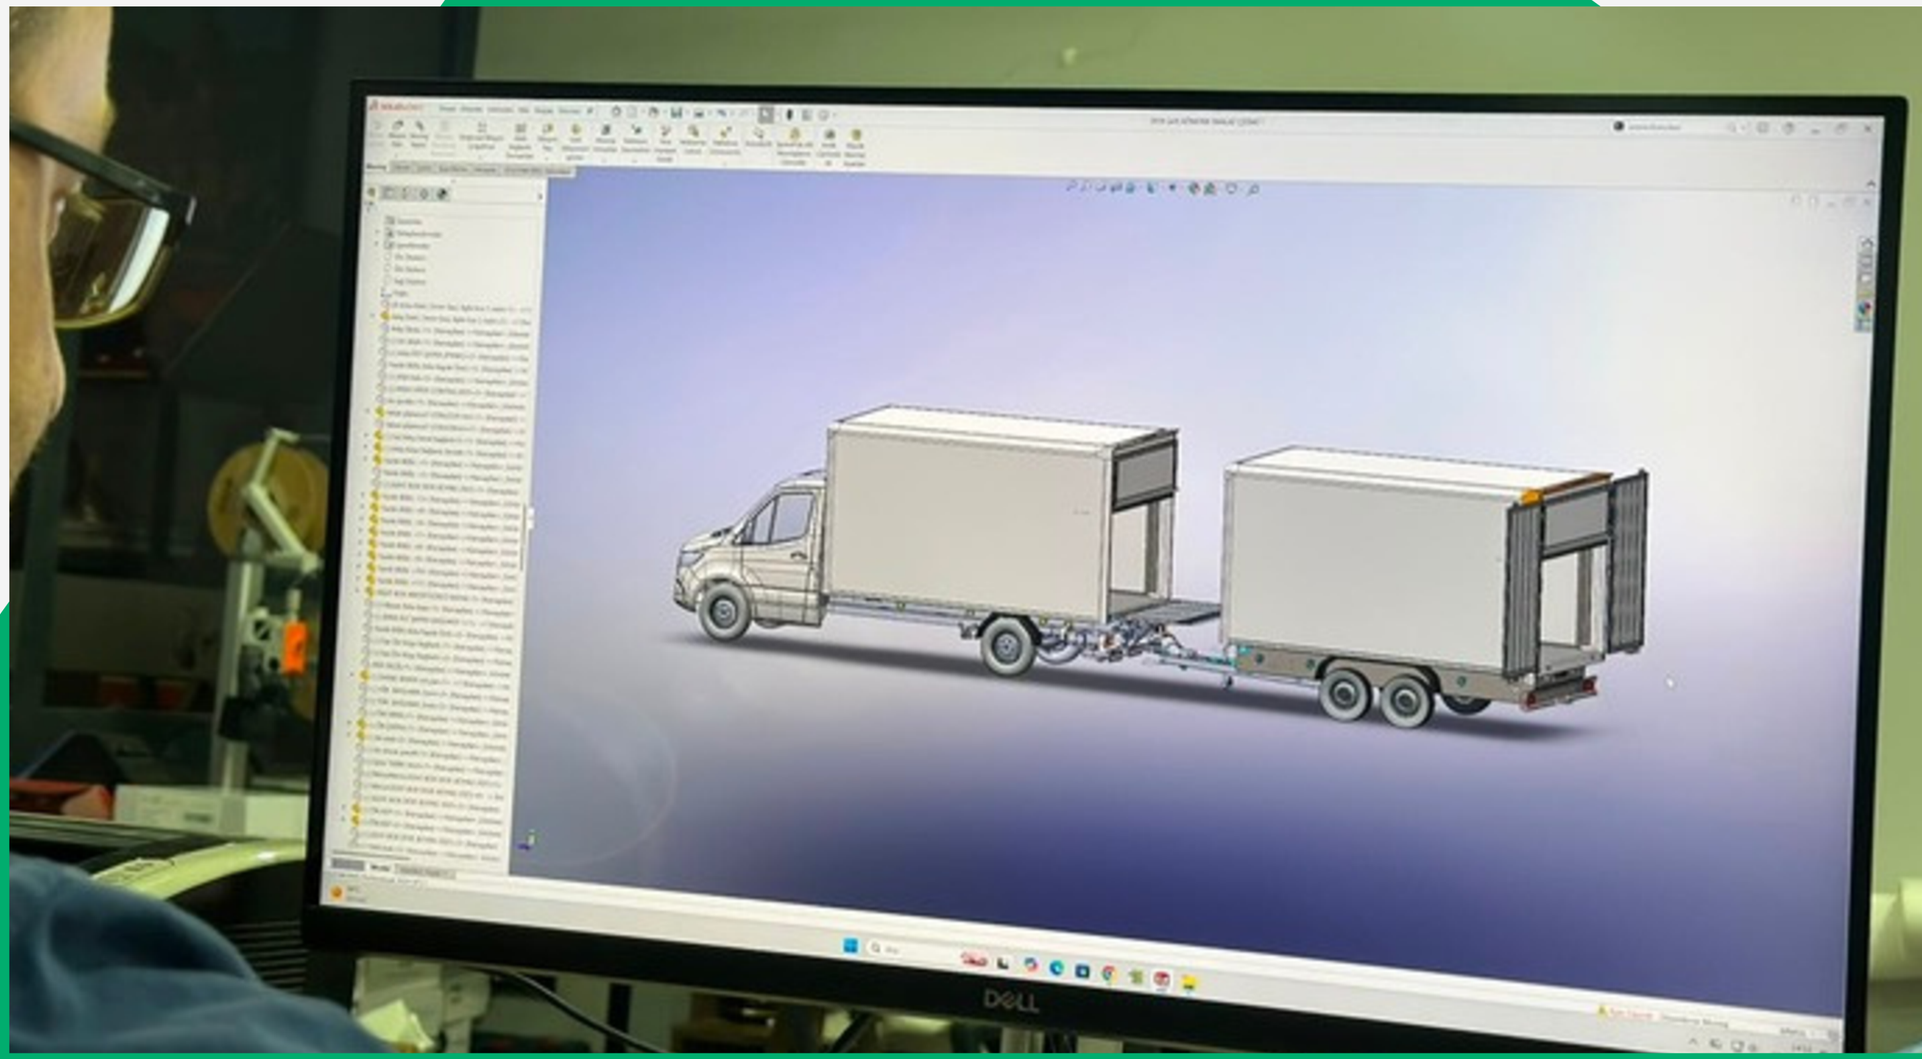
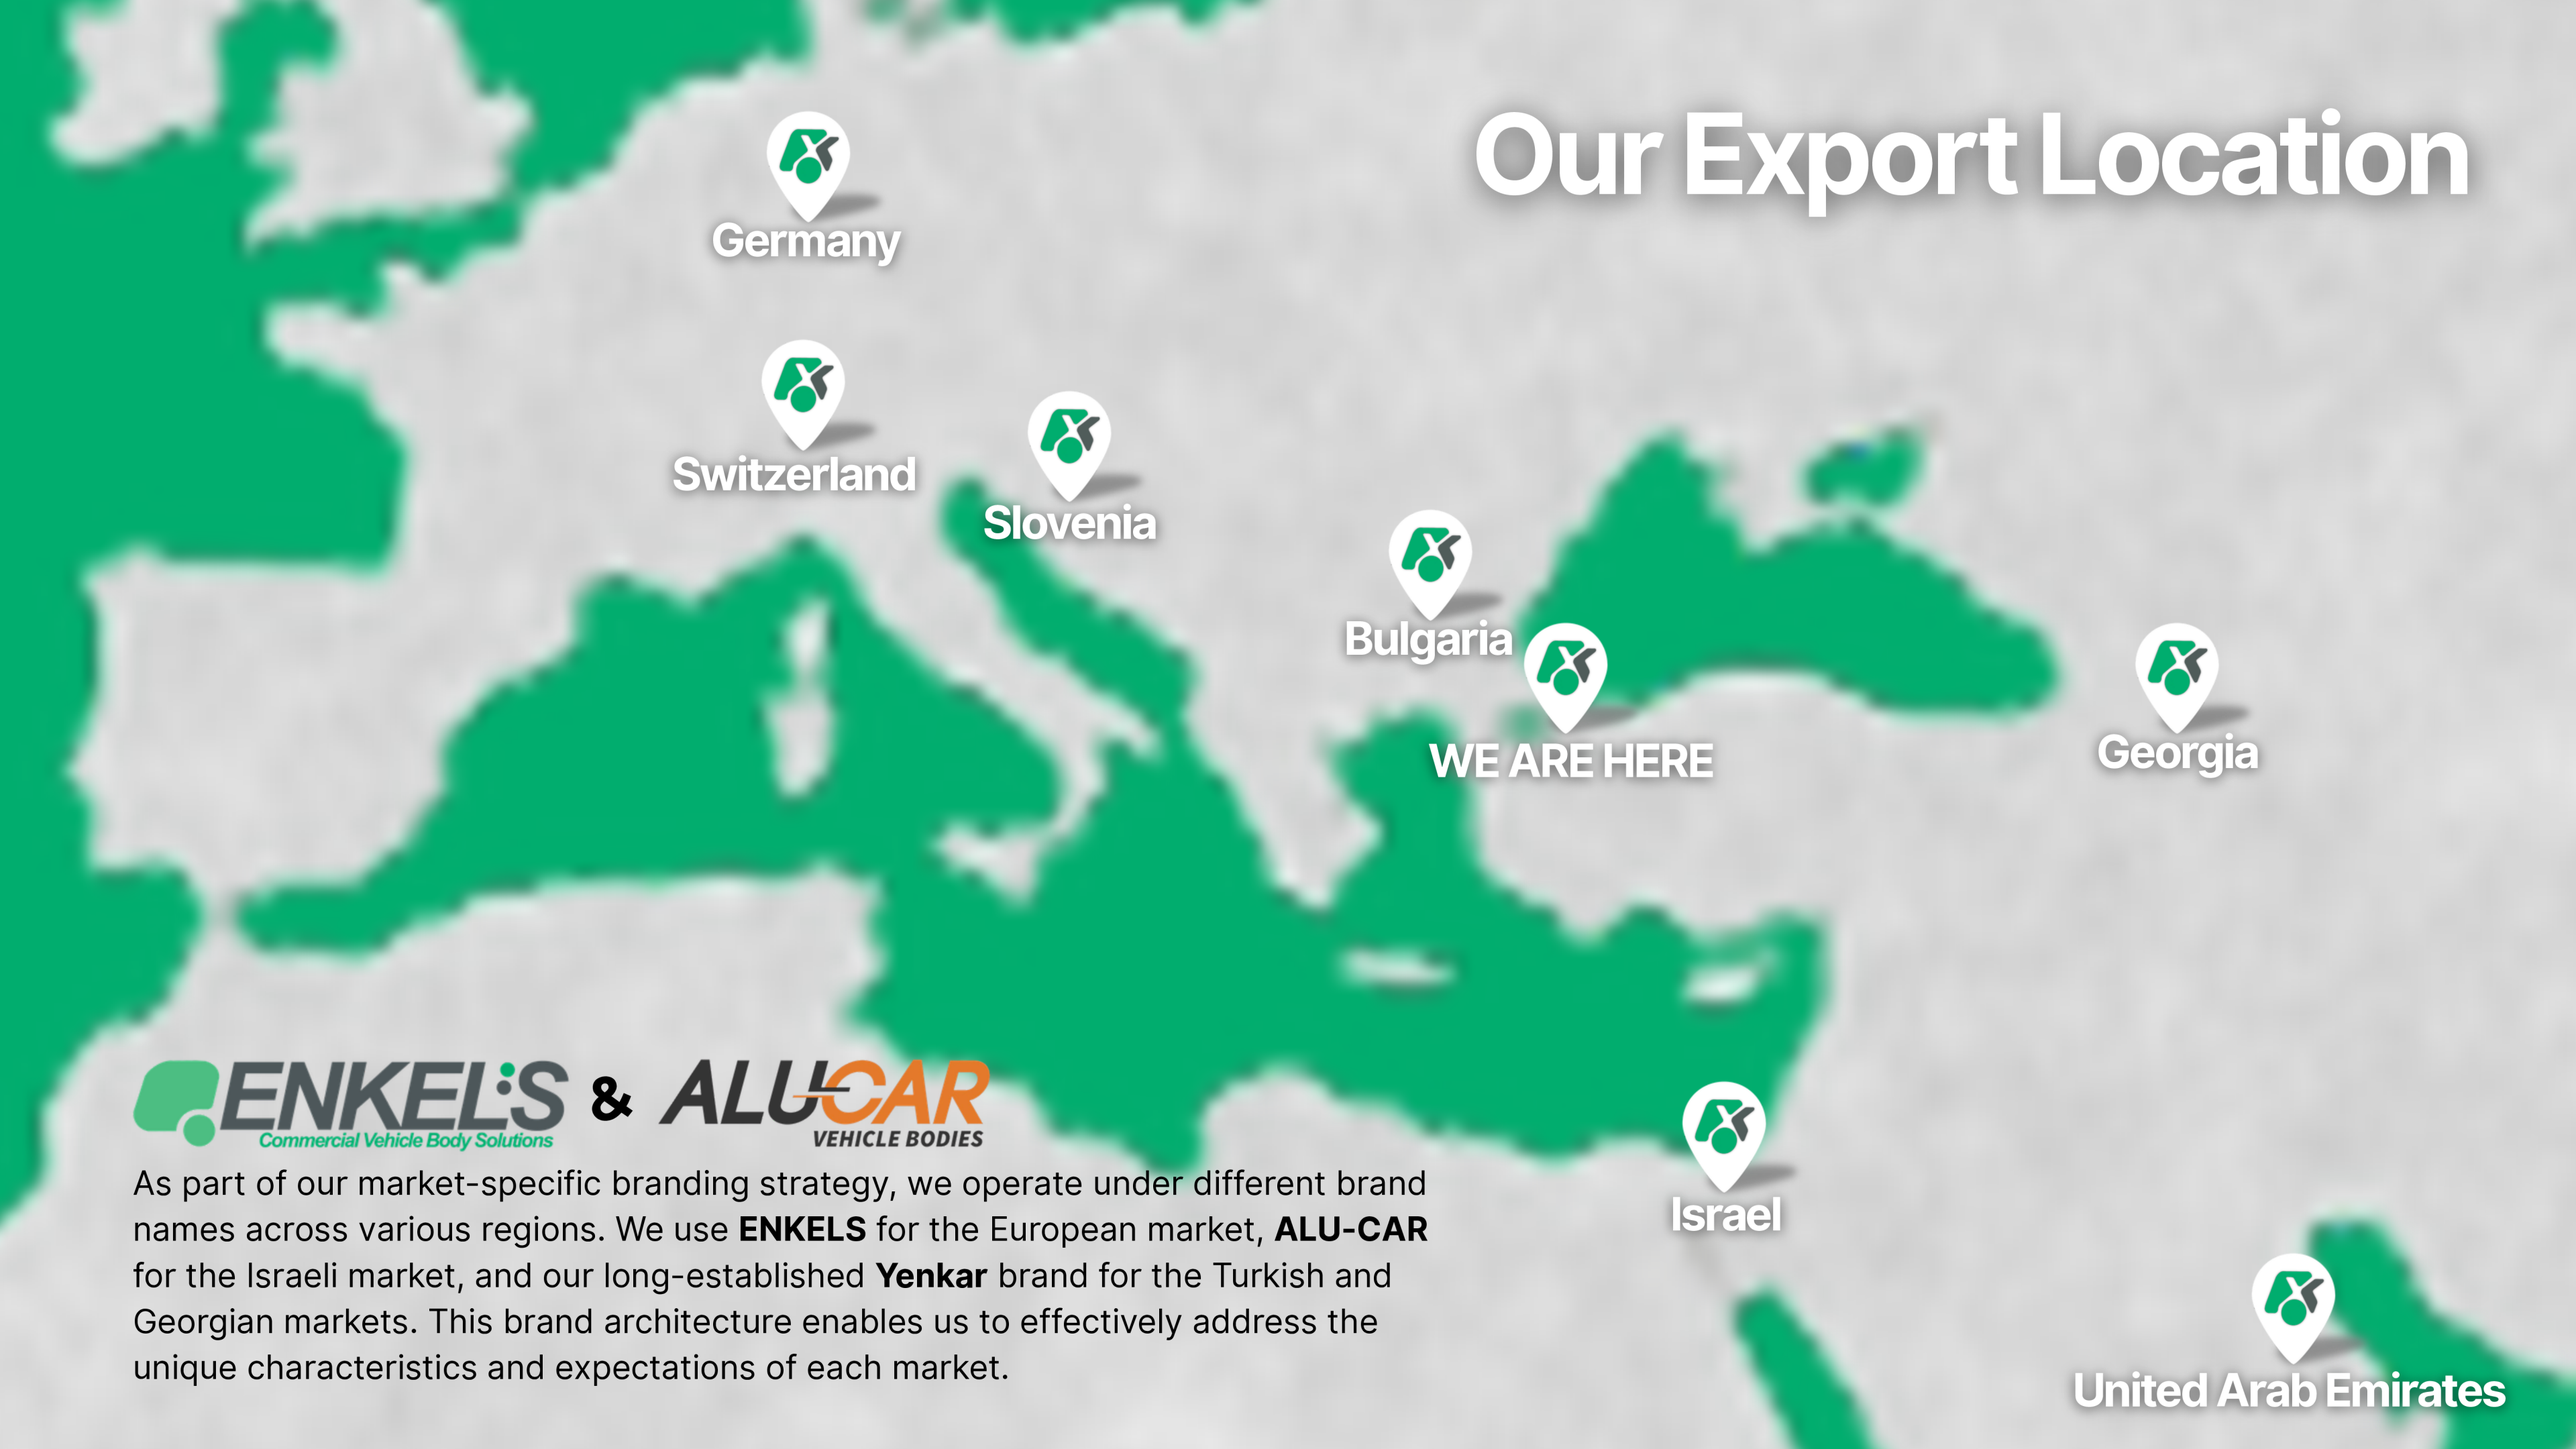
Enginering & Desing

From the initial concept to the final design, we help turn your ideas into innovative aluminium solutions. Whatever your commercial vehicle or trailer type, we develop products tailored to your technical and operational requirements.



Our Export Location



ENKELS Commercial Vehicle Body Solutions & ALU-CAR VEHICLE BODIES

As part of our market-specific branding strategy, we operate under different brand names across various regions. We use **ENKELS** for the European market, **ALU-CAR** for the Israeli market, and our long-established **Yenkar** brand for the Turkish and Georgian markets. This brand architecture enables us to effectively address the unique characteristics and expectations of each market.

Operating since 1977, Yenkar Torunlar Karoser San. Ltd. Şti. continues its activities by combining its deep-rooted industry experience with an innovative approach. Supporting traditional customer relations with modern production technologies, our company manufactures commercial vehicle superstructures that are unique in Turkey.
In line with this vision, we continue to grow internationally by exporting to Europe, Asia, and Africa in the commercial vehicle bodywork sector.

All Products Can Be Shipped Disassembled

All of our designed models are available in knock-down (KD) form for efficient shipping.

Our production is primarily driven by customer-specific requirements, with each product managed as an individual project. At the same time, our export programs and standardized product concepts developed for our corporate customers enable us to achieve greater production efficiency and shorter lead times.
Our annual production capacity is approximately 600 units across seven main product categories, while also accommodating unlimited bespoke projects tailored to customer requirements. Around 95% of our production is built on brand-new vehicles.
